

NIRANJANA P

Python Full Stack Developer

☎ +91 751029896 | ✉ niranjana234@gmail.com | in [Linkedin](#) | 🏠 Kannur

Python Full Stack Developer Intern with hands-on experience in developing responsive and dynamic web applications using **Python, Django, HTML5, CSS3, JavaScript, and SQL**. Skilled in building frontend interfaces, developing backend functionality, integrating APIs, managing databases, and implementing reusable components. Familiar with Git and GitHub for version control and collaborative development. Eager to apply full-stack development skills in a software development environment while continuously learning and growing as a developer.

Experience

Python Full Stack Internship

Acadeno Research & Innovation Centre, Calicut [Ongoing]

- Currently undergoing a Python Full Stack Internship, gaining practical knowledge and hands-on experience in web application development.
- Developed a strong foundation in Python programming, including basic syntax, data types, control statements, functions, file handling, exception handling, and OOP concepts.
- Learned and practiced HTML, CSS, and React.js for creating structured and responsive web pages.
- Gaining knowledge of Django for backend web development and understanding the fundamentals of web application architecture.
- Developing an understanding of frontend, backend, database, and API integration concepts.
- Strengthening problem-solving, debugging, and programming skills through practical development tasks.

Technical Skills

React • HTML5 • CSS3 • Python • JavaScript • C Programming • Git & GitHub • Java

Projects

College placement preparation suite

Academic Project | HTML, CSS, Python, Node.js, Express.js PostgreSQL, REST APIs, JWT

- Developed a web-based placement preparation platform integrating aptitude practice, resume building, company preparation kits, mock interviews, and performance tracking.
- Implemented role-based modules for students, colleges, companies, and administrators to support placement preparation and management.
- Designed features for personalized learning, performance analytics, progress tracking, and company-specific preparation.
- Built the system using React.js, Tailwind CSS, Node.js, Express.js, PostgreSQL, MongoDB, Redis, and RESTful APIs, with JWT authentication and role-based access control.
- Designed a responsive, mobile-first interface with Progressive Web App (PWA) capabilities for accessible placement preparation.

Online Vehicle Parking System

HTML, CSS, Python Django, MySQL

- Developed a web-based parking management system that enables users to search available parking spaces, select preferences, and reserve parking slots.
- Implemented separate Admin, Parking Manager, and User modules for managing parking locations, slot availability, bookings, notifications, and reviews.
- Added parking manager functionality for slot management, booking approval, slot status updates, billing, and review management.
